My Projects

Lifebook: The project is based on the idea of a social network with the implementation of basic functionality and interaction with the server.

🖱️ https://bogdan-design.github.io/lifebook/

Todolist: The project is an enhanced to-do list with error validation, registration, and the ability to add and delete tasks through a server.

🖱️ https://bogdan-design.github.io/Todolist/

Cards: The project involves the idea of teaching the English language through flashcards with sentences.
